Create a CV with Bootstrap to conquer the World!

Tutorial step by step:

- Create a web page consisit of raw contents of your resume.

- Use the `<h1>` .. `<h6>`, `<p>` and `<div>` tag to organize your content and then `<em>`, `<strong>`; also maybe look at the `<section>` and `<article>` HTML5 tags!

- Import bootstrap in the `<meta>` tag of your website (http://getbootstrap.com).

- Add a personal photo (`<img />` tag) and icons by category (you can use http://getbootstrap.com/components/#glyphicons or https://icomoon.io).

- Use multiple columns system to organize your content.

- Have a tea or coffee as your preference, if you want cookies, steal those of Perrine.

- Check if your site displays perfectly on mobile and tablet, if not then optimize it!

- Create a navbar consist of different page's sections , use anchors links `<a href="#...">` to redirect to different categories.

- Add links to your email address (`<a href="mailto:...">`) and Twitter / Linkedin profile (if you have one); then add a Facebook / Google+ like button!

- Use the bootstrap carousel module; find examples of paralax effects.

- Decorate with amazing CSS3 animations and integrate videos or musics!

- Complete your beautiful portfolio, you should finally get this result: http://cihadturhan.com or http://www.rleonardi.com/interactive-resume (at least).
